

Information about the distribution of start numbers for the inferno downhill:

- *Whenever possible, start numbers are allocated in accordance with the previous three years downhill results (overall results).*
- *A 54th place as best result entitles to a starting number from 54 or a 628th place to a starting place from 628.*
- *The 30 best women from the last three events will start in a block between 201 and 230.*
- *A shift to the rear must be expected, as there are usually more eligible persons than available starting numbers per strength class.*
- *The start numbers between 900 and 1000 are reserved for entrants in the Super-Three, if they have not already been allocated an earlier number.*
- *The last 100 numbers from the start list are the first competitors on the course, they are known as „Sternchenfahrer“.*
- *Participants who have failed to gain at least a bronze in the last three years or are starting for the first time have their entries drawn from a hat. They receive numbers towards the end of the starting list if their team is picked from the lucky dip.*
